

Design & Analysis System

Perfume bottle design

Initial sketches and ideas

Develop a Structural Concept

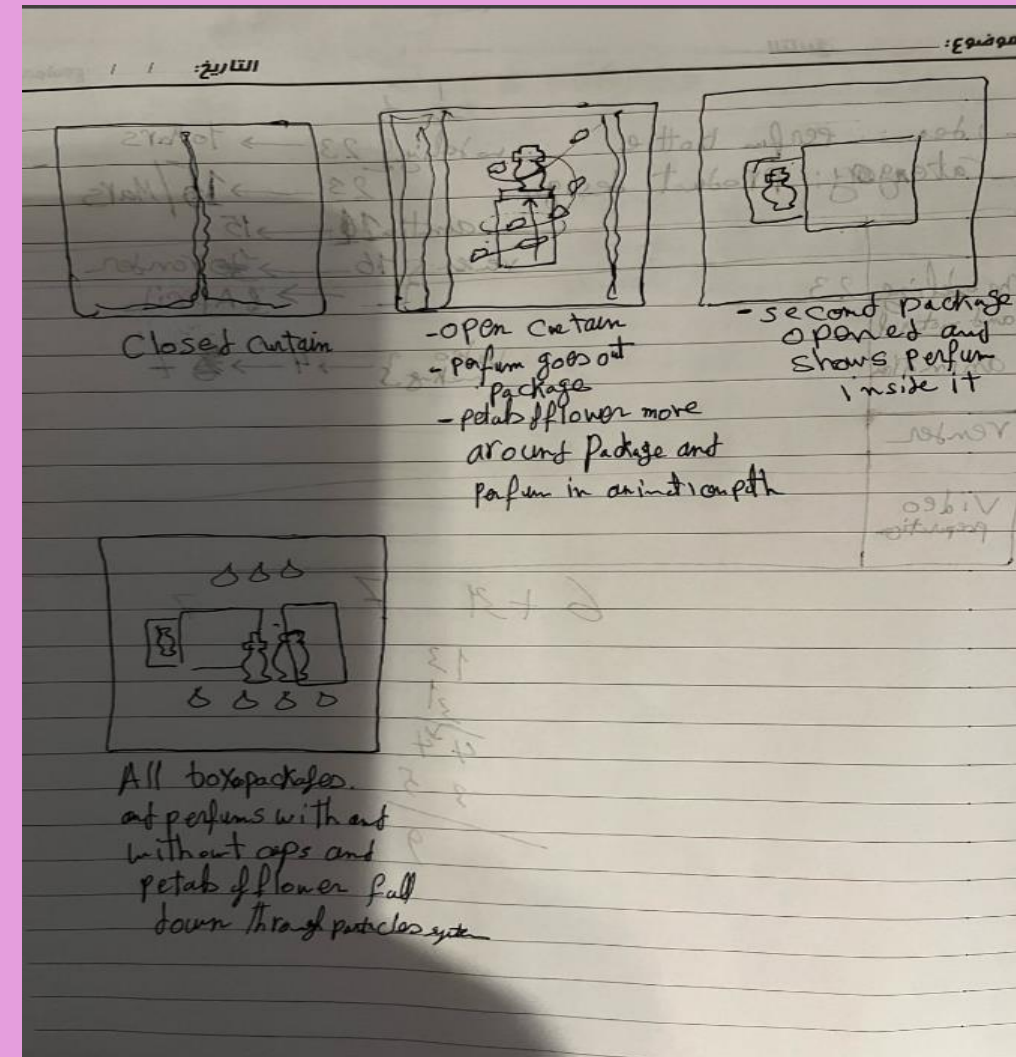

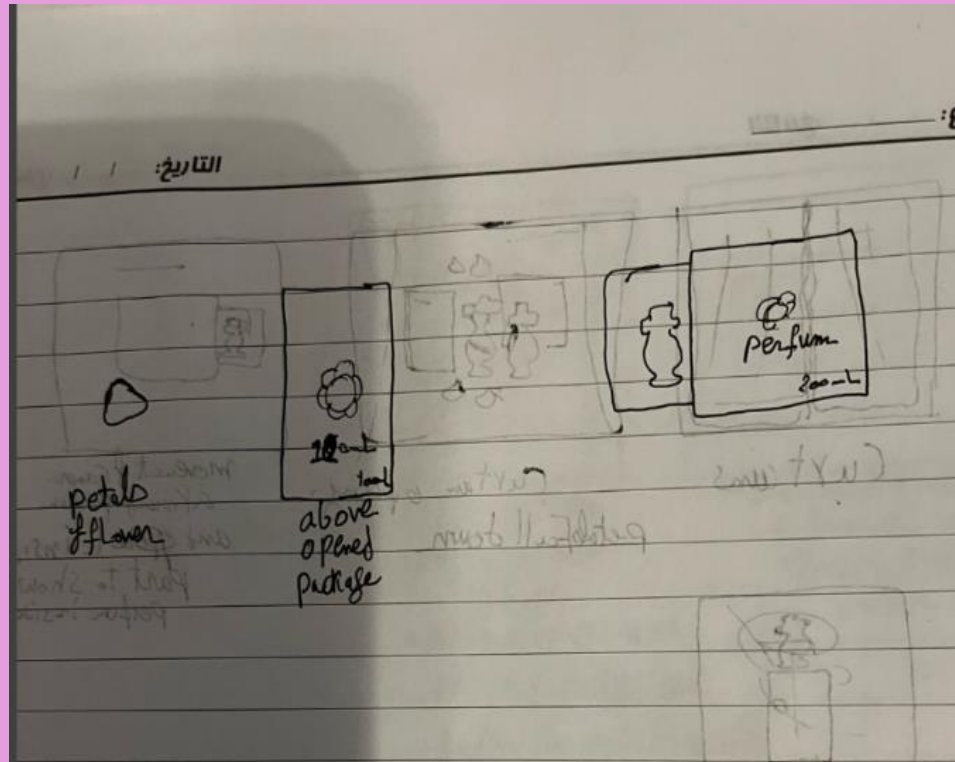

Identify Stages of Modeling, Texturing, Lighting and Animation

- Modeling: perfume bottle , package boxes ,curtains ,petals of flowers.
- Texturing: Apply materials and textures to give my models realistic surfaces.
- Lighting: I will use light that that will enhance the visual appeal in Arnold for example plane area.
- Animation: camera , petals ,curtains perfume bottle That will move. And box package will pulled inside part in which bottle is located.

Develop a structural concept for the 3D models and their design style

Create sketches or initial conceptual drawings for the models and environments

Determine Animation Techniques

- **Keyframing:** Use keyframing to define specific points in my animation timeline.
